

# *Fairisle Infant Gardening Club*

The Gardening Club, for children in Year 1 and 2, has had a successful summer with growing and harvesting runner beans. Also the children learned how to seed, grow and cut marigolds and amazing sunflowers. We recycle fruit cores and skins and feed our compost bins to make new soil for next year.

Future plans for the Gardening Club is to branch out further by cultivating and improving further areas such as, the Year R's garden and the planting troughs which lie under each classroom' window.
